

The Renewable Plastics Report

RNG Plastics · True Sustainability

- The Truth that Sets You Free •
- Pyrolysis Is Dangerous • Georgia Residents Agree •

New Products & Innovations ----- | ----- Sustainability & Environment

The Recycling Truth Is a Myth *[cannot be denied]*

Less than 10% of plastics can be recycled (in reality—*downcycled*).

- Recyclers want clean, colorless, plastics, which are uncommon. No contaminants.
- PCR plastics have inferior properties.
- Manufacturing equipment requires regular cleaning, adjustments.
- **APR recyclable plastics cost more.**
- Plastic recycling is **carbon-positive**. Bad for climate change.

With less than 10% of plastics being recycled, why wait years for collecting and sorting operations to come to your city?

RNG Plastics are here today and only requires our proprietary compounds and masterbatch to get started. After all...

The truth shall set you free

Recovery

	Rate	Cost*
Recyclables	Less than 10%	.4% - 2% more
RNG Plastics	Over 80%	.4% - 2% less

*Based on APR requirements for PE films

Set Yourself Free 80%+ Recycling Rate - Lower Costs!

If you want to wait until “recycling operations” come to your community, at least start using *RNG Plastics* in the meantime:

- Convert fossil fuel plastics into renewable, **carbon-neutral *RNG Plastics***.
- Same superior properties, performance.
- One-time easy-to-make machine adjustment.
- **Lower cost than APR recyclable plastics.**
- **Positive effect on climate change.**

With 80%+ of RNG Plastics fully recycled into renewable biogas and RNG it is called the *Holy Grail* by leading scientists.

It has no negative effects on landfills and helps stabilize them for centuries ahead!

Why wait for your community to set up collection and sorting systems to downcycle its contaminated plastics?

Make the right choice!
We look forward to meeting you!

The EPA Says Pyrolysis is Incineration

Frankly many states don't either. Simply stated, it consumes excess energy, produces dangerous toxins, and is a danger to communities. The EPA still refers to it as incineration. [Read more...](#)
