

The Renewable Plastics Report

Truth · Beauty · Goodness

- **The Good, the Bad, and the Ugly** •
- Common sense vs. social media •
- RNG Plastics: carbon-neutral for centuries to come •

Science / Truth Eradicates "*Beliefs*"

RNG Plastics Will Replace Fossil Fuel Plastics for Centuries to Come

"Just throw it in the trash" and this happens in 2050:"

- 97% + recovered at EPA-regulated landfills, it generates no added waste.
- Requires negligible farmland.
- Food prices are low, and;
- Food preservation improves.

Bioplastics / Composting Will **NEVER** Replace Fossil Fuel Plastics

This is what happens in 2050 if it did:

- 50+ billion tons of bioplastic generates 60 billion additional tons of annual waste!
- U.S. conversion to bioplastics consumes over 87% of all U.S. farmland!
- Food prices soar!
- Food spoilage increases significantly.

- Nutritional U.S. foods are shipped worldwide.
- Global warming is mitigated.
- Water purity improves.
- In hospitals and homes, disease prevention is improved.
- The economy, inflation, and commerce is stabilized.

Get started and convert your plastics into renewable RNG Plastics. It is easy and only takes a few weeks to make the change!

You can become a partner with the EPA. Help it reduce methane emissions into the atmosphere...and **safely capture and reuse it instead!**

- Mass famine sets in.
- GhG from composting substantially increases global warming.
- Massive water contamination from pest control chemicals and fertilizers.
- Superweeds blanket the Midwest.
- Hospitals shut down due to viral and pathogen contamination.
- Inflation is off the charts.
- ADM becomes the single largest worldwide benefactor.

And that is just the beginning!

The pursuit of bioplastics to replace fossil fuel plastics was wrong in the first place!

Help stop the compostable obsession!

For more info on why and how all this happens, contact us: bia@rngplastics.com. It is really just common sense.

The Ugly [Truth]

Social Media Provokes Devastation of Mankind & Planet Earth

- Science is distorted by so-called social media experts. Just because a person posts a lot on social media, doesn't mean he/she is an expert!
- Ocean cleanup removes 25,000 pounds of trash from Great Pacific Garbage Patch. Fact: Over 90% of ocean plastics come from S.E. Asia. Do-gooders spend \$100,000's to clean up Asian trash, convert it into downcycled, non-recyclable products that is landfilled it in the U.S.!!!

Government and Laws Increase Pollution, Disease, Waste

- The EPA has no records supporting bioplastics have ever been composted. 90%+ are contaminated and universally rejected at

industrial composting facilities.

- CA has a law [\(SB1046\)](#) requiring certain plastics to be compostable. But they are banned most CA cities. #1 reason: they are contaminated.

Worse yet: Not being composted they immediately release GhG, worsening global warming.

Schools and Universities Teach False Science into Students

- Look, every scientist and expert in-the-know in the plastics, chemical, and materials trade know that compostable plastics are not composted and 90% of all plastics will never be recycled. Why are our institutions allowed to teach such absurdities? [Parents—it's time to speak up for truth!](#)

- [Greta Thunberg will no longer speak at a climate event, accusing a sponsor of greenwashing by investing in companies tied to the fossil fuel industry \(msn.com\)](#). What she says supports "THE BAD" guys. Which school(s) taught her that?

You Can Help Your Families Have a Safe Healthy Future

RNG Plastics are a permanent, carbon-neutral solution for centuries to come

[Get started today and make tomorrow a beautiful day.](#)

RNG Plastics - good for mankind
