

The Renewable Plastic Report

Carbon-Neutral, Truly Sustainable

- BP, Rumpke, and Archaea *Get it!* •
- The never-ending alternative - the 3 Rs - a Mel Gibson fantasy •

Redefining the Future

What do BP, Rumpke, and Archaea See that Others Don't?

Answer: The future! Here's what they see / know:

- RNG (*Renewable Natural Gas*) – interchangeable with fossil fuel natural gas.
- As long as there are humans, animals, and plants living on earth there will be RNG.
 - 300+ RNG conversion plants today – **43,000 by 2050!**
- The bidding war for RNG (methane) sources is underway!

How do RNG Plastics fit in?

- RNG Plastics can double the amount of methane captured in landfills when fully implemented.
- RNG can forever replace fossil fuel natural gas feedstock at plastic resin manufacturers.
- A simple, safe, healthy, permanent solution for centuries to come.

**BP deploys Archaea modular RNG plant
at Rumpke landfill**

BP, Rumpke, Archaea, and RNG Plastics help mitigate global warming. You can too!

RNG Plastics™

Renewable for centuries to come

**The Never-Ending Alternative Is the 3 Rs –
Repurpose, Reuse, and Recycle**

Just ask Mel Gibson

**Jump on the recycling
bandwagon!**

Join the ~~club~~ brawl. After all, a lot of workers make money sorting and cleaning filthy, weakened, contaminated plastics.

We don't get it. 90% of plastics will always be contaminated...and not recyclable... downcycled at best.

Be one of tomorrow's leaders!

Get a padded recycled polyester suit and dyed wig--before they turn into shreds, fragments and microplastic.

And yes...a rusty recycled metal overcoat is a must (for protection against shareholders)!

Who honestly believes the 3 Rs are a viable, permanent solution?

Next newsletter - *The Importance of Methane*, and
the secret to high quality, renewable plastics for years to come

**The only sustainable plastic solution is intuitive...and has been overlooked
for years!**

False conclusions abound based on erroneous [recycling] concepts. And many
governments actually support it! The damage it is doing can be reversed.

Read the next newsletter and see why recycling is so greatly misconstrued.
