

RNG Plastics – Years Ahead of EPR & Recycling Laws

A sustainable closed-loop solution available today

- A high 85%+ recycle / recovery rate exceeds EPR laws •
- California's SB 343 recycling law requires new single-use markings •
- The federal *Renewable Natural Gas Incentive Act* – This is **HUGE!** •

Be on the forefront of this technology – save money

What you need to know – California's SB 54 and SB 343

Take a giant step into the future with the RNG Plastics technology:

- Exceed EPR requirements
- Boost your ESG score
- Shrink your carbon footprint
- Have the same high performance as FNG plastics
- Renew your plastic products for centuries to come
- Lower costs – **avoid .05 to .010 per pound EPR fees**
- **RNG Plastics are not a threat to successful recycling programs**

Minimal or no cost increase

Stay ahead of the new recycling laws (ie. SB 343) and EPR laws (ie. CA SB 54) and simultaneously boost your ESG score, contact Thom to receive a free, full report:

hello@rngplastics.com

California's SB 343: California mandates companies to use the cross-out logo on single use plastics and food **service items** that cannot be recycled. Includes all contaminated plastics and products that are not available to at least 60% of a community's population.

The new non-recyclable logo required by California's SB 343 law.

California's SB 54: RNG Plastics are an **exception to this law**. It is supported by legislators and environmentalists and support federal initiatives and emerging federal legislation.

Other EPR laws: Many other states have laws pending and being written. Many are waiting for California to take the first step.

COP28 leads the way: Supported by the Paris Agreement countries worldwide, renewable energy was the top priority to eliminate fossil fuels by 2050. RNG Plastics produce renewable fuels today!

The road ahead will not be without challenges. Implementing the COP28 agreement will require sustained political will, significant financial resources, and offers a glimpse into a cleaner, more sustainable future for all.

\$1 per gallon tax credit to use RNG!

Energy users can cut their energy costs!

Congress has a bill giving users of RNG fuels a HUGE credit!
It's incredible! Your RNG Plastics could basically be free using this offset.
