

Safe Methane Capture in EPA Landfills

- Only RNG Plastics are *renewed* at EPA regulated landfills with LMOP partners •
- "Supposedly recyclable plastics" flood Southeast Asia •
- NPE next week - let's meet! •

Which Packaging Materials Are Being Renewed?

Legend

- **Compostables brands:** Ingeo, BASF, hybrids, and others.
- **Oxo – degradables:** EPI, Symphony, and all others.
- **Bio-accelerators:** EcoPure, Ecologic, and all others.
- **RNG Plastics:** RNG Plastics are Landfill-Safe.*

Only RNG Plastics are renewed at the EPA's LMOP partnered landfills

Compostables, oxo-degradables, and bio-accelerators are pro-degradants that speed up

biodegradation and generate greenhouse gas. They can also leave behind toxic residues and microplastic. They cost more than RNG Plastics with inferior performance properties.

***RNG Plastics'** supplemental masterbatches safely enable the plastic to be recovered (aka recycled) at EPA regulated landfills with **LMOP partners**.

Supposedly Recyclable Plastics Are Flooding S.E. Asia

Southeast Asia's plastic tidal wave: Imported trash swamps region - Nikkei Asia

Much of this Southeast Asian waste comes from Europe, Canada, a little from the U.S.

Plastic waste is shipped to Asian companies and instead of recycling, much of it is dumped, washing up on the shores of

Indonesia, Malaysia, Thailand, Vietnam, and elsewhere.

Most of this plastic waste could have recycled / renewed if only they had used *RNG Plastics* to begin with!

Let's meeting at the NPE!

If you're heading out to the NPE next week, let's meet! Send us an email and we'll be in touch.

This is promising to be a very hot menu for packaging, sustainability (dictionary definition) and recycling (all four types).

Email us to meet at the NPE
